Executive summary

Summary
Evidence-backed assessment of explicitly selected security rules.

Finding status
{"candidate": 0, "confirmed": 1, "rejected": 0, "retest_pending": 0, "retest_verified": 0}

Scope and methodology

Scope
http://127.0.0.1:45551

Method
Explicit rules, source-bound requests and valid controls. Evidence remains local; observations are reviewed at their recorded verification level.

Coverage
No selective retest comparison supplied; no claim of current coverage beyond retained executions.

Workflow variant skip-approval

Finding ID
workflow-db1e2da8dc5a70d195028579:skip-approval

Status

confirmed

Interpretation

violation

Controls valid

True

Cleanup

complete

Rule

{"id": "approval", "kind": "forbidden_state", "pointer": "/state", "value": "completed"}

Reason

Independent state probe established the configured transition result.

Workflow trace

db1e2da8dc5a70d19502857935403c79044218b9d220b12917d4a0d79841f161

Limitations

Fresh fixture identifiers and independent probes bind the configured object only.
Response bodies are transient; signed state evaluations are attested, not independently replayable from body digests.

Bounded workflow assurance

Cycle status and history anchors

[{"cycle": 1, "history": {"created_at": "2026-10-10T17:35:53.298Z", "cycle": 1, "id": 1, "previous_sha256": "0000000000000000000000000000000000000000000000000000000000000000", "record_sha256": "2e4a4e36561b4acd1fb5dc947b541dd9ac7927fae8a1d680e4e72905b4fbf4b5", "scope_key": "f4c23857cfb4ca2110ba58a64c902553bf0ad83e2f20c0e35aac25c890fe1584", "workflow_digest": "db1e2da8dc5a70d19502857935403c79044218b9d220b12917d4a0d79841f161"}, "status": "violation", "stop_reason": "workflow_violation"}]

Scope

Each cycle retains its original workflow trace and materialized report roots. The shared budget and finite schedule bound this observation period; no future assurance is implied.

Limitations and independent verification

Limitation

This is a scoped assessment, not certification or complete ASVS/WSTG/API coverage.

Limitation

Finding status, technical severity and business risk are separate dimensions.

Limitation

A restored configured check is not automatically a verified vulnerability fix.

Limitation

Retest omissions retain not_retested and historical evidence only.

Limitation

Signatures authenticate retained bytes and signing keys; they do not prove remote execution truth.

Limitation

Replayed oracle inputs are approved projections; their relationship to unavailable raw response bytes remains signer-attested.

Limitation

The standalone verifier provides integrity_only; semantic verification requires AuthzLedger and the pinned report renderer.

Verify

Obtain the public-key fingerprint through an independent trusted channel. Run: python3 -I verify_bundle.py PACKAGE --public-key TRUSTED.pem. The package manifest supplies the signer fingerprint. Then run AuthzLedger verify-bundle for retained evidence and exact report semantics. Never trust a key solely because it is inside the package.
